Making & using this work:

To make this work, print all the pages out on cardstock and laminate. Cut apart the months, numbers and holidays.

You may want to use a small piece of Velcro on each square of the calendar (page 1), and a contrasting piece on each month, number and holiday square.

You will need to add a current full-year calendar to this work so that the child knows which day the month starts on, and which holidays are in that month. You can certainly cut a real calendar apart and only put out the page that has the current month on it. Just remember to change it every month.

You can also make extra copies of page 1 and let the child fill in the numbers when they're done putting out the pieces.

The "Days of the Months" poem is fun for everyone to memorize, and helps kids remember how many days each month has.
